

Mission Statement and Boilerplate Statement

Serve for Cures is a nonprofit organization that enables volleyball teams to raise money for organizations close to their hearts. Our organization gives 100 percent of the profits to a team's charity. It is our belief that through donations to medical research, we will be able to find cures or other ways to tolerate the pain levels to maintain life a little longer.

Founded in July 2012, Serve for Cures' mission is to give donations to the organizations that allow medical professionals to do research for possible treatments. Anyone can sign up a team of two for a match in the beach volleyball tournament. It's not winner takes all, but at the end of each match there is a cash reward to their charity regardless of whether they won. With this philosophy, we hope to end suffering from diseases.
